HTML CSS JS Python Figma Spline

Web Development

I'm building awesome websites! I use my skills in front-end and back-end coding, along with design tools like Figma and Spline, to create websites that look great and are easy to use.

Bot Development

I created some fun Telegram bots for a game!(it was for my bestfriend) One of them is a guessing the word by combining two images game. I'd love to share them with you, but they have some inside jokes that might put both of me and my bestfriend in jail.⛓

App Development

I'm excited to be turning my web apps into mobile apps! It's a great way to make them more accessible and convenient for users. I'm particularly interested in exploring new features and design elements that are specific to mobile devices. Stay tunned i'm cooking something 😬

Tsega

Hey I'm Tsega
I'm a Software Engineer

Generally a software engineering student at Addis Ababa University. I'm passionate about creating innovative software solutions that make a positive impact. From designing intuitive user interfaces to building scalable backend systems, I'm excited to explore the endless possibilities of software development. I'm always eager to learn new technologies and collaborate with talented individuals to bring my ideas to life.

Tsega

About me

They say that I'm a reliable and dedicated person well, they didn't lie. I'm passionate about combining my love for art with my technical skills to create visually appealing and innovative software solutions. I'm excited to apply my creative eye to designing user-friendly interfaces and developing software that not only solves problems but also delights users.
From being a total gaming addict as a kid, I've managed to turn my passion into a career! Now, instead of just wasting hours playing games, I'm actually creating them. Whether it's designing game apps, coding game bots, or building epic gaming websites, I'm always on the lookout for the next big thing in the world of gaming.

My skills

Skills reflects our knowledge

In the world of software development, skills reign supreme. It doesn't matter if you're 11 or 81 – if you've got the skills, you're in demand. I've always been a self-learner, constantly pushing myself to master new technologies. With the rapid pace of change in the software development industry, I stay on top of the latest trends and make sure I have the necessary skills to succeed.
My skillset includes HTML, CSS, JavaScript, Figma, Spline, and Python. I'm always eager to expand my knowledge and explore new tools and frameworks that can help me create innovative and efficient software solutions.

Tsega

My hobbies

I love sketching and playing football. I don't have as much time as I used to, but I still play whenever I can. I know you might be bored with my educational stuff 😁, so take a break and check out some of my sketches and dribbling 🖌️🎨⚽
